Tea Tree

Acne is a long-term skin disease that occurs when hair follicles are clogged with dead skin cells and oil from the skin. It is characterized by blackheads or whiteheads, pimples, oily skin, and possible scarring.
Acne commonly occurs in adolescence and affects an estimated 80–90% of teenagers Children and adults may also be affected before and after puberty.Although acne becomes less common in adulthood, it persists in nearly half of affected people into their twenties and thirties and a smaller group continue to have difficulties into their forties.
That is why the cosmetologists of Refan have developed Tea tree series that is intended for oily and blemished skin. It heals and mattes the oily skin and controls oiliness.
Tea tree oil consists of antibacterial and antimicrobial compounds that act effectively against the bacteria that cause acne breakouts. This essential oil can penetrate deep into the skin and helps to unblock the sebaceous glands.
The Tea tree series includes facial anti-acne products and anti-dandruff shampoo.
