

Парфимерија

Основниот дел од парфемните производи, произведени од фирмата се парфемни води. Сите парфемни води имаат броеви, се нудат над 230 вида на парфемни води.

Сите парфемни се класифицирани според нивниот носечки мирис во табела.

Во неа се наведени соодветните броеви парфемни од Рефан.

Разновидноста на парфемите е толку голема што класифицирањето понекогаш е тешко и многузначно.

Женските парфемни се распределуваат во неколку големи групи:

- Цитрусни - во оваа група место заземаат парфемни со свеж, лесен, цитрусен и цветен мирис.

- Групата "Цветни" е најголемата во светот на женската парфимерија. Парфемите во неа имаат цветен мирис како главна тема. Тие се поделени на неколку подгрупи во зависност од нивните нијанси во мирисот. На пр. овошни, водни, зелени, итн

- Групата на ориентални парфемни се поврзува со мирисите од Истокот - егзотични зачини, ванила, балсами од Арабија и Индија.

- Другата голема група се дрвенести или кипрови парфемни. Нив ги обединува акордот од цитрус, дабов мов и пачули.

Машките парфемни исто така имаат своја класификација. Тие се делат исто на четири големи групи:

- Првата повторно е цитрусна - свежи, цитрусни парфемни со дрвенеста база.

- Ароматни парфемни - овие парфемни во парфимеријата, интерпретираат класичен акорд меѓу лавандата, дабовиот мов и една од првите синтетички материи - кумаринот.

- Дрвенестите парфемни се најголемата група. Кај нив карактеристични се миризбите на кеदार, сандал, пачули и ветивер. Поделени се во подгрупи - водни, зачинети итн.

- Ориенталните, слично на женските, се со ориентални звуци и содржат ванилести, амброви и зачинети ноти.
