## PERFUMED BODY SPRAY

To boost the perfumery effect and not to mix different types of fragrances, in addition to its perfumes REFAN has developed the new PERFUMED BODY SPRAYS, along the same lines of scent as the fine perfumery. They are available in the form of aerosol body spray. Special formula moisturizes and softens. Gentle to the skin, they give a feeling of freshness and cleanliness, perfume pleasantly, load with energy and optimism, bring romance and charm. The new perfumed sprays are suitable for everyday use, with modern and stylish fragrances for women and men.
