

# Vitamin C

100% OF THE PARTICIPANTS IN A CONDUCTED USER TEST ARE SATISFIED WITH THE PRODUCTS OF THE SERIES!

When losing Vitamin C, skin loses smoothness, elasticity and youth. REFAN's Vitamin C facial range of products contains a stable, oil-soluble form of Vitamin C that:

- Has very good absorption through the skin;
- Inhibits intracellular tyrosinase and melanogenesis (whitening);
- Reduces UV-induced cell DNA damage (UV protection / anti-stress);
- Prevents lipid peroxidation and skin aging (antioxidant);
- Increases collagen synthesis and collagen protection (anti-aging).

REFAN company uses one of the most stable formulas of vitamin C, it is synthesized in a Japanese laboratory and has a proven whitening effect. Vitamin C has long attracted the attention of cosmetologists, and discoveries in recent years confirm that it plays an important role in maintaining skin beauty and health. It participates in all processes taking place in the skin - growth, restoration of connective tissue, protection from the harmful effects of the environment, healing of wounds, synthesis of collagen, which prevents premature skin aging. It actively suppresses the production of melanin, thereby reducing the formation of pigment spots and freckles. It beautifully whitens skin. Vitamin C is a powerful antioxidant, binding free radicals that are formed under the influence of the environment and as a result of the physiological processes in the body. It has unique protective properties. In sun-damaged skin, its content is significantly less than in normal skin, as it is used to prevent and neutralize the negative effects of sun's rays.

Vitamin C day cream protects skin from UV rays and by protecting it from the formation of free radicals, it fights against premature aging.

Vitamin C night cream restores skin at night and fights the wrinkles formation.

Vitamin C facial serum has a proven whitening effect. It is used separately by applying 1-2 times a day on the pigment spots or over the whole face. You can complement the effect of your favorite cosmetics by applying before the face cream. Do not use during the summer months on skin, not protected by a sun protection product.

## Products

### VITAMIN C SKIN LIGHTENING FACE SERUM

For optimal effect, use with REFAN'S latest product FACIAL FILLER VITAMIN C.

A POWERFUL CONCENTRATE FOR LIGHTENING OF COMPLEXION AND SPOTS!

VITAMIN C whitening facial serum contains the highly effective ingredients: olive squalane, vitamin C and vitamin E. Based entirely on natural ingredients, it not only has a whitening effect, but also regenerates skin. REFAN company uses one of the most stable formulas of vitamin C, which is synthesized in a Japanese laboratory and has a proven whitening effect. It is oil-soluble and retains its activity throughout the shelf life of the cosmetic product. Olive squalane is a natural moisturizer, it has good skin compatibility, improving its elasticity and softening it. In combination with vitamin E, skin is additionally protected from premature aging.

Concentrated, but easily absorbed by the skin vitamin C, which visibly lightens complexion, including the pigment spots that have appeared. Stimulates collagen synthesis, strengthens tissues and reduces skin oxidative stress caused by environmental factors. Also contains:

- Olive squalane: nourishes skin at night and improves its elasticity;

- Vitamin E: protects skin from premature aging by preventing the destruction of collagen.

Results of a conducted USER TEST for Vitamin C whitening facial serum:

- 92.9% of the users have a good tolerance to Vitamin C whitening facial serum.

After the test, participants felt:

- 92.9% lightening of skin pigmentation after 1 month of use;
- 100% lightening of skin pigmentation after 2 months of use;
- 100% tighter oval;
- 100% smoother skin

After taking into account all the criteria from the user test:

- 92.8% of consumers would use again Vitamin C whitening facial serum;

- 100% of users are satisfied with Vitamin C whitening facial serum.

How to use: use separately by applying 1-2 times a day on the pigment spots or over the whole face. You can supplement the effect of your favorite cosmetics by applying before the face cream. Do not use during the summer months on skin, not protected by a sun protection product.
