SNAIL PERFECTION

Snail extract - an effective ingredient in anti-aging skincare products

In our busy everyday life we do not notice the appearance of first wrinkles, sagging skin and uneven skin tone. We use various means in order to slow down skin aging process. Some of the most effective means have proved to be the ingredients derived from nature. This is the case with snail extract. One of its main features is to activate skin. Its main components are:

Allantoin - moisturizes skin by increasing the water content therein, promotes clearance of already dead cells and reduces inflammation
Collagen and elastin - improve skin elasticity and reduce fine lines
Glycolic acid - provides exfoliation of skin
Hyaluronic acid - activates cell division and skin regeneration, reduces wrinkles and helps to add volume to aging skin, provides deep tissue hydration
Proteins - soften skin
Vitamin E - a powerful antioxidant that protects skin from free radical damage

Snail extract, rich in active components, stimulates cell functions, activates protein synthesis and skin regeneration and slows down skin aging processes

Products

06353

Fluid-concentrate

The fluid-concentrate is suitable for active treatment of aging, withered and problematic skin. Snail extract stimulates cell functions, activates skin regeneration and slows down skin aging processes.

Paraben-free

Use: For best results apply to problem skin areas. It works well independently or with other skin-care products.
