

REFAN EXTRAIT de PARFUM

The new Extrait de parfum Refan collection of fragrances follows the global trends in perfumery art. They are created and produced in Grasse, France - the cradle of classic French perfumery. These are avant-garde scents in the most luxurious category in perfumery, skillful combinations of valuable ingredients, with a high content of perfume compositions - over 20%. The fragrances are deeper, richer, more complex than those of Eau de parfum, with gradual disclosure of perfumery notes, which outspread slowly, but have strong intensity and durability.
