

Argan & Keratin

Winter is a beautiful season, but cold months can leave lasting effects on skin and hair. As a result of lower temperatures, sebum production decreases thus leading to additional hair drying. Refan offers a new, especially developed series with organic Argan oil and prebiotic active ingredient - „ARGAN & KERATIN“.

„ARGAN & KERATIN“ cream-shampoo and hair mask contain organic Argan oil and Keratin.

Organic Argan oil restores split ends and gives them silky softness. Also known as the “Liquid Moroccan gold”, it is a natural product that has been used by the African women for centuries, for cosmetic and medical purposes. In combination with biomimetic keratin, which resembles the keratin naturally found in hair, it provides targeted restoration of damaged hair surface.
