

MOISTURIZING

SNAIL EXTRACT AND ALOE VERA GEL CONCENTRATE

Some of the most commonly used extracts in cosmetics: Snail and Aloe Vera extracts, are combined in REFAN's MOISTURIZING SNAIL EXTRACT AND ALOE VERA GEL CONCENTRATE series. The series includes: day cream, night cream, facial serum and body cream-butter. We use a highly effective active ingredient: Aloe Vera gel concentrate, which is grown in Mexico and is of guaranteed quality. It contains over 300 indispensable for the skin substances, including sugars, vitamins, trace elements and amino acids. Aloe Vera gel concentrate has a strong regenerating, hydrating and anti-inflammatory effect. It is widely used in cosmetic products, thanks to its extremely positive effect on the skin. Its properties have been documented for over 5,000 years and applied in Chinese, Indian and Egyptian cultures. Aloe was present as one of the favorite herbs in the beautifying rituals of the Egyptian queens. The other active ingredient in the series is a standardized snail extract of guaranteed French origin, which stimulates cellular functions, supports skin regeneration and slows down the aging processes. It activates the dermis thanks to the valuable components it contains - allantoin, collagen, elastin, glycolic acid and hyaluronic acid.
