Organic Waters

Organic lavender water
LAVENDER

Organic lavender water is obtained through distillation of the flowers of lavandula angustifolia mill, grown in an ecologically clean area near the village Tarnichene, district of Kazanlak. Lavender plants and soils are not treated with pesticides, fertilizers and other synthetic preparations. Organic lavender water has soothing and refreshing properties. It has also anti-inflammatory, moisturizing and tonifying effect on skin.

Use: apply lavender water directly on to skin with a cotton pad or cloth.
