

## Vitamin C

**100% OF THE PARTICIPANTS IN A CONDUCTED USER TEST ARE SATISFIED WITH THE PRODUCTS OF THE SERIES!**

When losing Vitamin C, skin loses smoothness, elasticity and youth. REFAN's Vitamin C facial range of products contains a stable, oil-soluble form of Vitamin C that:

- Has very good absorption through the skin;
- Inhibits intracellular tyrosinase and melanogenesis (whitening);
- Reduces UV-induced cell DNA damage (UV protection / anti-stress);
- Prevents lipid peroxidation and skin aging (antioxidant);
- Increases collagen synthesis and collagen protection (anti-aging).

REFAN company uses one of the most stable formulas of vitamin C, it is synthesized in a Japanese laboratory and has a proven whitening effect.

Vitamin C has long attracted the attention of cosmetologists, and discoveries in recent years confirm that it plays an important role in maintaining skin beauty and health. It participates in all processes taking place in the skin - growth, restoration of connective tissue, protection from the harmful effects of the environment, healing of wounds, synthesis of collagen, which prevents premature skin aging. **It actively suppresses the production of melanin, thereby reducing the formation of pigment spots and freckles. It beautifully whitens skin.** Vitamin C is a powerful antioxidant, binding free radicals that are formed under the influence of the environment and as a result of the physiological processes in the body. It has unique protective properties. In sun-damaged skin, its content is significantly less than in normal skin, as it is used to prevent and neutralize the negative effects of sun's rays.

**Vitamin C day cream** protects skin from UV rays and by protecting it from the formation of free radicals, it fights against premature aging.

**Vitamin C night cream** restores skin at night and fights the wrinkles formation.

**Vitamin C facial serum** has a proven whitening effect. It is used separately by applying 1-2 times a day on the pigment spots or over the whole face. You can complement the effect of your favorite cosmetics by applying before the face cream. Do not use during the summer months on skin, not protected by a sun protection product.
